The CCRA User Manual can be sent to you in electronic format.

Do you want your manual e-mailed to you?

Yes, I want my manual and newsletters in electronic format.

No, I want a paper copy of the manual and newsletter.

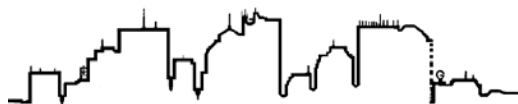

Mail this completed application with your check or money order to:

**CCRA
913 Middlebury Dr N
Worthington, OH 43085-3372**

If we didn't answer all your questions call (614) 361-5582

Or

e-mail to: ccra@ohioccra.net

The 147.21 MHz, 444.00 MHz, and 145.270 MHz machines are all "no frills", single site machines. The "21", "27", and "4.00" machines are located in downtown Columbus, the 442.5 MHz machine is located in Gahanna. All these repeaters are known for their fine audio reproduction.

The CCRA repeaters are also home to the Central Ohio Traffic Net which meets every night at 7:15 P.M. on "24".

The "24" repeater is also a backup repeater for the Central Ohio Severe Weather Net (COSWN). Additionally, all club repeaters are made available to the Central Ohio ARES whenever they need an extra repeater for an event.

The CCRA issues an award winning quarterly newsletter *The Radiogram* and has an award-winning web site to help inform, train, and entertain our membership. We also have monthly pizza parties, generally on the second Saturday of the month, for those "eye-ball" QSO's.

We invite you to use our fine system and to attend one of our social functions. The annual dues are only \$15 for one year, \$28 for two years and \$41 for three years.

Why not "check us out"? Come to one of our pizza parties or join us on the air! We are certain that you will like what you hear!

Capital City Repeater Association

Serving the Capital City in a Capital Way

Home of the Central Ohio Traffic Net

Visit our fine repeaters on the following output frequencies:

- **2-meter band:**
 - 147.240 MHz K8DRE
 - 147.210 MHz N8TBQ
 - 145.490 MHz (D-Star) K8NIO*
 - 145.430 MHz (123.0 Hz) N8PVC
 - 145.270 MHz (82.5 Hz) WA8PYR*
- **70-cm band:**
 - 442.500 MHz KB8SXJ
 - 444.525 MHz K8DRE
 - 444.550 MHz (123.0 Hz) N8PVC
 - 444.000 MHz (D-Star) K8NIO*
- **1¼-meter band (future):**
 - 224.84 K8DRE
- **6-meter band (future):**
 - 53.67 MHz (179.9 Hz) K8DRE

Note: * = Affiliated repeater

The Capital City Repeater Association is an ARRL Affiliated Radio Club.

What can CCRA offer you?

- Free Family Memberships
- Lower cost Multi year memberships
- Many Autopatches
- Reverse Autopatch
- Reverse Patch Page
- Free Family speed dial numbers
- Many Emergency speed dials
- 100 User defined speed dial number
- Linked Voice Mail Systems
- Rig Test Tools (Echo, DTMF and others)
- Pizza Parties
- Fox Hunts
- CW Learning Net
- Monthly SSTV Net
- Discussion Nets
- Technical Nets
- NTS Traffic Net (daily)
- NTS instructions (daily)
- Support of monthly hidden transmitter "Fox Hunts"
- Award winning
 - Web Site
 - Newsletter
- Detailed User Manual for all repeaters
- ARRL Membership
- Field day information
- VE Test Information
- Simulated Emergency Test Information
- Severe Weather Spotting Information
- ARES event support
- Late night "Soap Box" discussions

Capital City Repeater Association

The Capital City Repeater Association (CCRA) invites you to "join-in" on the fun and to become part of the friendliest repeater club in Central Ohio. We are proud to operate one of the finest and most active repeater systems in Ohio. We are working very hard to make and keep it the best. Our five 2-meter, one 1¼-meter (220 MHz), four 70-centimeter (440 MHz) and one 6-meter repeaters have many "bells and whistles".

The following is just a highlight of what we have to offer:

First is our 147.24 MHz 2-meter repeater system. "24" has three receiver sites and is controlled by the most advanced computer operated repeater controller made. It provides excellent mobile and hand held coverage in and around Central Ohio. This machine will support 1,000 users, each with their own (100) speed dial numbers and with reverse patch paging capabilities. This "super repeater" is linked to both a 1 1/4-meter (224.84 MHz) and a future 6-meter (53.67 MHz) repeaters which in the future can be accessed by amateurs from all three bands.

Additional features include: emergency speed dialing, open autopatch, voice mail, time, temperature, echo test, DTMF test and a system to allow you to test your equipment and signal quality. The CCRA User Manual explains how to access all of these features and much more!

Next is our 145.43 MHz repeater. The "43" machine is a single site repeater located downtown Columbus and is linked with the 444.55 MHz repeater providing dual band, full duplex access. "43" uses the same controller as the "24" repeater, and therefore has all of the same capabilities.
